

GAS LEAKAGE DETECTION CODE

```
// Pin Definitions

const int gasSensorPin = A0;

const int ledPin = 8;

const int buzzerPin = 9;

// Threshold value (adjustable based on calibration)

const int gasThreshold = 400;

void setup() {

    pinMode(ledPin, OUTPUT);

    pinMode(buzzerPin, OUTPUT);

    Serial.begin(9600);

}

void loop() {

    int gasLevel = analogRead(gasSensorPin);

    Serial.print("Gas Sensor Value: ");

    Serial.println(gasLevel);

    if (gasLevel > gasThreshold) {

        digitalWrite(ledPin, HIGH); // Turn on LED

        digitalWrite(buzzerPin, HIGH); // Activate buzzer

    } else {

        digitalWrite(ledPin, LOW); // Turn off LED

        digitalWrite(buzzerPin, LOW); // Deactivate buzzer

    }

    delay(500); // Small delay to avoid spamming the serial monitor

}
```
